

From Rags to Riches

After exploring the world, Yubi Kirindongo returned in 1977 to his Curaçao and became a full-time artist. Active now for more than four decades, Yubi has become an iconic artist, well-known worldwide.

His art exhibits a solid social, historical and environmental conscience, underlined by his particular use of material. Evidence of this is his use of discarded materials and strange leftovers of our consumer society, which he transforms into artworks that focus on social, historical, and environmental issues without losing sight of the aesthetics and technical qualities of his sculptures and assemblages. His car bumper sculptures enjoy great popularity in the Dutch Caribbean and abroad.

However, he also works with other varying forms of discarded materials such as wood, glass, computer chips, rusted car parts, tools, and animal skulls in creating his magnificent works of art.

Mini Car - bumper art

Museo Yubi Kirindongo — Kaya Reis 390

In Curaçao, his artworks can be seen at his house, an artwork in its own right, which functions as a home, a gallery, and a museum with a garden designed in the form of a park with sculptures and statues created by Yubi.

Barbados, and China.

Suriname, France, Cuba, Germany, South Africa, he has exposed his works in the U.S.A., Brazil, Aruba, Bonaire the Netherlands. Furthermore, Yubi has had numerous expositions in Curaçao, and therefore much en vogue in wide circles of art lovers worldwide.

As a result, these materials get a second life and emphasize their value and beauty. His artworks are very original and immediately eye-catching, and therefore much en vogue in wide circles of art lovers worldwide.
